

UTS Foundation Pledge Scheme

The pioneering UTS Foundation Sport and Activity Hub has been created to celebrate life and foster local pride. We endeavour to challenge, educate and inspire some of the most vulnerable groups in society to engage, share stories and help others. The strength and passion of the UTS Foundation has developed a creative culture, which allows participants to unlock their potential and acquire an understanding of their self-worth enabling them to heighten their self-confidence and ultimately help others within their groups and community.

The UTS Foundation is set on four pillars of strength, which spans from Young People to Cancer Survivors are as follows :

**1 Giving youth
back to children**

**2 Giving life to
the living**

**3 Foster local
pride**

**4 Celebrate
life**

Our passion has been contagious and our philosophy of giving back has filtered through to national, local business, UTS staff, members and the local community offering everything from a positive thought, time, expertise and funding. We need passionate people and partners who are motivated to help people, give back and foster local pride and this is where you come in!

Community Sports, Health and Education Hub

This inclusive facility will offer the following:

- A bespoke cancer care centre to allow cancer patients to recover after treatment
- A facility to help vulnerable people with mental health issues to recover
- A state of the art youth facility for youth development from grass roots to excellence
- Physio and ehabilitation Space (including; Endless Pool (Swim Treadmill))
- Counselling and Workshop Rooms
- Healthy Eating Cafe and Seated/Viewing Area

Outdoor Community Sports Development Facility

The UTS Foundation Outdoor Community and Sports Project is an exciting extension of the UTS Foundation Health Hub project that focuses on developing an underused site in Hoylake into a multi-purpose community sports hub that will meet the needs of the local population and compliment existing sports provision within the area.

Project Need

Working alongside the Macmillan Nurses, Clatterbridge Hospital, Wirral CAMHS, Wirral Hospital, Josph Paxton School, NHS Wirral and a number of other specialist organisations we have discovered that there is very little structured health and fitness provision for these groups to utilise in order to help them recover and improve their lives.

Open Access

We will have a structured timetable in place that allows local and disadvantaged people to access our coaching programmes and facilities free of charge. However there will be times when charges will be made for facilities at certain times of the day, such as the 3G pitch to ensure that the project is sustainable.

Community Wide Appeal

There will be a range of structured and coached physical activities, such as boxing, martial arts, athletics, strength training, sports leagues, sports camps and team building which are designed to meet the needs of the general public to access local, elite level provision.

Education

This will be a safe structured facility with expert tuition in exercise and nutrition advice alongside physiotherapy and counselling support with facilities for education and learning to educate patients, children and young people about various issues and courses relating to sport and physical activity.

UTS Foundation Pledge Scheme

The UTS Foundation Pledge Scheme allows you to invest in our project with real tangible benefits to local people and the local community. Below is a list of some of the items that you can contribute towards and chose to support. Through the pledge scheme you get to shape the project with us and create a long term sustainable investment in the project.

What can I get with my pledge?

FAQ

How long will this take? We anticipate that this will project take between 3 and 5 years to raise the funds and to deliver the project.

Can we follow the Pledge Scheme Progress? Yes - we have set up a website theutsfoundation.com and fundraising page <https://funds.gofundme.com/dashboard> to demonstrate how much funding is coming in and how close we are to reaching our target. The account is designed to be independent of The UTS Foundation and the money raised for this scheme will pay for the project costs.

How can I find out more? If you would like to know more about this exciting new project why not give us a call on 0151 294 3172 or email uts.tonyberry@gmail.com to arrange a short presentation and meeting to discuss this further.

Supporter Quotes

Sue Weir, CEO Medicash

This is a wonderfully ambitious project that will have life-changing impacts. From enabling the most vulnerable people in our community (particularly those recovering from cancer) to access friendly exercise sessions, nutrition advice and support; right through to providing local sports clubs with access to excellent facilities; this project will help to create a healthier and happier community. Medicash are proud to support the Pledge Scheme and sincerely urge you to join us.

Jackie Hall MBE

I have worked closely with the local people of Hoylake for a while now and I have to say this is one of the most exciting and ambitious Hoylake projects to date. I believe that this project is such a unique and positive venture that it will have a dramatic impact on the lives of those who attend, especially people recovering from cancer and the younger generations who need structured activities to help them develop and grow.

Sarah Stevenson MBE (Olympic Medalist)

First and foremost I'm a great believer in the power of sport and physical activity to improve people's lives and bring people together. I'm blown away by the ambition and vision of this project. It tackles so many issues in our community, such as ill health and lack of structured sporting activity that I urge anyone to get involved and support this project.
